Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

Over the past twenty (20) years, Reliable Energy has become one of the largest private contractors providing HVAC and weatherization services to low-income households in Southern California by meeting contractual obligations, fulfilling City Code, Utility Company, California State and Federal requirements & standards, and achieving goals with a superior quality of workmanship and service. Due to the development of effective and efficient business models, Reliable Energy has been able to achieve and surpass increased unit goals over three (3) consecutive years by delivering quality services to qualified customers. Reliable Energy has grown from a successful HVAC contractor to an experienced, knowledgeable, and respected low-income energy efficiency and weatherization service provider.

Currently, Reliable Energy holds contracts with the Southern California Gas Company, The Southern California Edison Company, San Diego Gas and Electric, the Community Action Partnership of Orange County, the Community Action Partnership of Riverside County, Community Action Partnership of San Bernardino, Pacific Asian Consortium in Employment, and Avalon Carver Community Center for the installations of weatherization, HVAC, and energy efficiency measures.

Stellar Sustainable Consulting, LLC provides support to existing weatherization service providers, along with community outreach and education in disadvantaged communities regarding environmental health/sustainability, energy efficiency/solar energy, climate change and green industry jobs and careers. Our expertise is in outreaching to hard-to reach communities and producing and conducting events and workshops that engage and educate community members on these issues.

Our team consists of energy efficiency, solar energy, green homes experts and sustainability analysts, and, professionals skilled in workforce/leadership development, change management and outreach and curriculum design. Over the past 5 years, Stellar Sustainable Consulting has collaborated with utilities, local government officials, CBO's and non-profits, and energy efficiency/solar energy experts to educate residents about healthy, high performing homes and neighborhoods. And just as important, we recruit, train and hire local residents to assist us with energy efficiency audits/repairs, outreach and education efforts to ensure credibility and long-term success with our efforts.

Our energy efficiency contractors possess the following accreditations:

- Ø C.S.L.B Green and Sustainable Building
- Ø Building Performance Institute - Building Analyst
- Ø N.C.I Commercial HVAC
- Ø N.C.I Air Balancing Residential
- Ø Build It Green Certified

Over the past 8 years, Enso2 contractors have performed over 2500 energy audits for SCE in disadvantaged communities.

GRID Alternatives is the country's largest 501(c)(3) nonprofit solar installer, with over 7,000 low-income solar projects completed to date, totaling over 24 megawatts. GRID Alternatives is a mission-based nonprofit organization and a full-service solar installation company, providing complete solar program administration and installation services including site assessment, design, permitting, financing and installation. GRID Alternatives is recognized as a leader in workforce development by training and leading teams of job trainees and other volunteers to install solar electric systems exclusively for low-income families. With 10 regional offices and numerous solar contractors serving all of California, GRID brings substantial statewide program administration experience, including the sole Program Administrator for California's \$162 million Single-family Affordable Solar Homes (SASH) program. GRID has developed key public-private-nonprofit partnerships that enable the organization to make solar electric systems affordable to low-income families and integrate workforce development opportunities into every installation. Energy Efficiency coordination is central to GRID's work and continues to be fully integrated into all of GRID's programs. GRID Alternatives has been a leader in advocating for low-income solar policies in California while working with a large network of partners in affordable housing, job training, energy efficiency and solar.

Since 1967, Proteus, Inc. a non-profit community based organization operates community, employment, training, and energy efficiency programs in the Central Valley and expanded its service territory to San Bernardino and Los Angeles County. Since 1985 Proteus has been providing energy efficiency services and serving the under-served and un-served communities. Proteus is a direct contractor with the public utility companies such as Southern California Edison, Pacific Gas & Electric, Southern California Gas Company to implement the Energy Savings Assistant Program (ESAP). Proteus prides itself on the ability to provide high quality customer service and safe installation services. At current capacity, Proteus employs twenty-two crews which provide energy efficiency installation services to approximately 1,000 homes per month throughout the service area. A typical weatherization installation crew consists of two certified and/or trained installation technicians. In addition to weatherization services, Proteus employs certified/experienced HVAC technicians which are able to provide safe and efficient HVAC repairs and replacements to eligible customers. Electric services include refrigerator replacement; evaporate cooler installation, window/wall air conditioner, weatherization, porch-light replacement, CFL, and pool pump replacement. Gas services include repair/replace furnace, water heater, windows & doors, weather-stripping & caulking, low flow shower heads, pipe insulation, and attic insulation.

Q3: Business Structure: Non-Profit

Q4: Approval to Share Information on CSD Website? Yes

Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

ACCES is the statewide weatherization association for Weatherization agencies receiving federal contracts. We have experience operating contracts for CSD as well as subcontracting with current weatherization agencies. ACCES has experience in a variety of programs, such as Training and Technical Assistance, Certified OSHA 10 and 30 training providers, Energy Upgrade California Ambassadors and participated in the Solar For All California program, just to name a few. ACCES is very familiar with the Disadvantage Communities and the definition of DACs. We currently have a direct contract with the Department of Water Resources to install water saving measures in the identified DACs of Tulare County. Under this contract we are subcontracting with a current CSD LSP for that area, CSET Community Services Employment Training. Under this contract we need to report, water and energy saved as well as CO2. We have the capacity and experience to run a shovel ready weatherization program due to our relationships with existing weatherization providers, and experience of running subcontracting programs.

Q3: Business Structure: Non-Profit

Q4: Approval to Share Information on CSD Website? Yes

Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

As a mission-driven nonprofit organization, Center for Sustainable Energy works with policymakers, regulators, public agencies and businesses as an expert implementation partner. Our areas of expertise include building performance, energy efficiency, renewable energy, energy storage, distributed generation, and clean transportation. We provide program management, workforce training and education, and technical assistance across the clean energy spectrum.

CSE currently implements over 35 clean energy and energy efficiency programs in California and across the nation, including Energy Upgrade California, Clean Vehicle Rebate Project, California Solar Initiative, and Multifamily Affordable Solar Housing. Across our wide portfolio of programs we implement strategies to allow greater ease of access for diverse communities, working to expand clean energy options for everyone. We actively seek solutions that address barriers to access efficient resources and clean distributed power in low-income, traditionally underserved communities. These communities often face a wide range of barriers to adoption of clean energy solutions, including lower discretionary income for sustainable choices that require up-front costs and language and cultural barriers. CSE is a recognized thought leader on key barriers and needs, existing solutions and the remaining gaps that must be addressed to ensure energy efficiency and renewable energy technologies are equally accessible in all communities.

Q3: Business Structure: Non-Profit

Q4: Approval to Share Information on CSD Website? Yes

Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

The SJCC&CS is a licensed general contractor #812939.

We are interested in primarily serving as a solar PV Contractor. We have staff that has been trained in LIHEAP and solar PV installation. We have low-income home solar installation experience and have installed 6 low-income home solar installations over the past year. We can also serve as an EE subcontractor as well. We also provide low-income home turf conversion and water conservation measures installation (e.g., high-efficiency toilet installation).

SJCC&CS has deep roots in the community and we are 'state-certified' through the Resources Agency each year to ensure that they follow best management practices. The conservation corps workforce development 'earn and learn' model has lifted tens of thousands of people across the state from poverty to prosperity. Conservation corps provides key academic and career technical education services that remove the major barriers to employment for under-serviced, low-income young adults that are in danger of becoming permanently disconnected and disenfranchised from society.

The SJCC&CS has conducted outreach and intake to low-income communities for 29-years as part of our charter high school and career technical education training programs. We have served over 20,000 young adults (ages 18-27) since our inception in 1987. We have deep connections with our community and have utilized multiple outreach channels including community presentations, engagement through our networks and partner organizations as well as social media, door-to-door, radio, TV, mail, etc.

The SJCC&CS staff has experience with green loans, power purchase agreements, on-bill financing, rebates, lines of credit, feed-in-tariffs, and grants in regards to financing. Our staffs have extensive experience in procurement and inventory management with CSD LIHEAP WX/EE programs and procurement of large quantities (25,000) of ultra-low-flush toilets.

Q3: Business Structure: Non-Profit

Q4: Approval to Share Information on CSD Website? Yes

Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

PACE is interested in serving as and/or contracting with the LIWP Regional Administrator for Energy Efficiency (EE) and/or Solar Photovoltaics (PV) services.

As a stakeholder in Los Angeles County for 40+ years, PACE has served over 800,000+ low-income individuals and families with our wide scope of services. Our programs include: Workforce Development; Early Childhood Education; Business Development—including access to capital; Financial Education and Asset Building; Affordable Housing; and Energy and Environmental Services.

PACE's Energy and Environmental Services Program has been working with the California Department of Community Services and Development (CSD) since 1979 to implement the Low Income Home Energy Assistance Program (LIHEAP) and the Department of Energy's Weatherization Program (WAP). PACE participates in the Toilet Replacement Program (TRP), CA Solar Water Heating Program, and is a subcontractor for the LIWP Solar PV Program.

Additionally, PACE is uniquely positioned to provide workforce development for job-seekers in the Green Technology sector. PACE operates a one-stop America's Job Center of California (AJCC) and provides access to training, soft skills development, employment tool-kits, apprenticeship opportunities and career pathways. PACE has a long history of training and successfully placing job seekers as Solar Panel Installers, Weatherization Technicians, and Recycling and Resource Management.

Other (please specify) Cooperative

Q4: Approval to Share Information on CSD Website? Yes

Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

The Energy Solidarity Cooperative (ESC) designs and delivers community-driven, cooperatively-owned clean energy systems and educational programs with community groups, such as non-profits, schools, and places of worship, in traditionally underserved and marginalized communities.

We work to build community power—social, political, infrastructural, economic and generative—as part of the just transition towards solidarity economies.

ESC is an Oakland-based multi-stakeholder cooperative comprised of worker owners, consumer owners and community-driven funders. These stakeholders combine energy consulting and training services, project sites and support, and community-based capital, respectively.

The central activities and practical outcomes of our model are to:

- (1) Build out more community-owned clean energy systems and energy efficiency measures in underserved communities;
- (2) mobilize non-extractive financing for such systems and measures by investors, while arranging secure refinancing;
- (3) save revenue for organizations operating at underserved sites, while generating revenue for worker services;
- (4) Grow the clean energy cooperative workforce with ecological and climate justice educational and training programs, anchored at these sites.

Evolve Technologies is a company comprised by a team of researchers, designers and engineers dedicated to continuously develop innovations in water and energy savings.

Our core technology, ShowerStart, conveniently saves the water and energy used while waiting for the shower to become warm. The ShowerStart TSV, a small thermostatic shut-off valve (TSV) is a great measure to save resources most don't even realize they're wasting, and conservation occurs without changing your normal routines or shower settings. This technology is available as a standalone model and also integrated in our showerheads and bathing fixtures, and has been included in a variety of weatherization and energy savings programs such as the LIWP, LIWP, ESAP, etc. Through these programs, we are committed to help people throughout California and the country in their everyday energy conservation efforts, and so far, over 1.3 million units have been installed.

Our evolve brand product lines include ShowerStart Valves, WaterSense Showerheads and Handshowers with ShowerStart valves, WaterSense ShowerHeads and Handshowers, and our latest water conservation measure, the Auto-Diverting Tub Spout system, which has our ShowerStart technology integrated in the tub spout for increased savings.

Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

Led by ABAG, the Bay Area Regional Energy Networ (BayREN) implements effective energy saving programs on a regional level and draws on the expertise, experience, and proven track record of Bay Area local governments to develop and administer successful climate, resource, and sustainability programs. BayREN has been successfully implemented residential energy upgrade programs since 2013. Our existing structure and experience with regional implementation of programs for single family homes, coupled with BayREN member agencies' experience running LIWPs within their jurisdictions, make us well qualified to be a regional administrator of LIWP. BayREN takes a regional approach to program implementation, but with an emphasis on local outreach activities, thereby leveraging the longstanding and trusted relationships our members have with their constituents. With our collective experience, we have established ourselves as innovative and successful program administrators. We have the capacity to expand our current program offerings, and see adding LIWP to our portfolio as a natural progression.

Urban Corps is a local conservation corps offering underserved young adults a second chance to earn their high school diplomas while participating in paid job training. Our unique dual focus engages these disconnected young people in solving real-world environmental and social problems in their own neighborhoods, simultaneously transforming their lives and improving the community as a whole. We operate through grants and fee-for-service contracts, and welcome the opportunity to collaborate with community partners. Trainees in our YouthBuild USA accredited pre-apprenticeship program are trained in the Multi-Craft Core Curriculum (MC3), providing vocational construction skills emphasizing green technology and clean energy. Urban Corps holds a General Contractor's License and is a Section 3 Business Concern. Our supervised crews of young adults are available for weatherization, energy efficiency upgrades, and solar PV system installation. We have completed over 600 residential weatherization projects to date in partnership with the City of San Diego. In addition, as a C-27 contractor, Urban Corps is available for drought tolerant landscaping projects which help households save water and energy. The majority of our projects take place in low-income neighborhoods around San Diego County, and many of our trainees come from the designated Disadvantaged Communities we serve.

John Harrison Contracting (JHC), Inc., a Minority Business Enterprise was established in 1987 to help households in the counties of Riverside and San Bernardino address their energy conservation and cooling needs. With nearly 30 years of experience, JHC has delivered energy efficiency services to thousands of households under contract by the southern California utilities and Public Housing Authority for Coachella Valley communities.

For nearly 30 years, JHC has continuously achieved its contractual obligations by delivering timely, quality, and professional services. As a result, JHC's clients have continuously extended and expanded JHC's role in their energy efficiency program plans. JHC has extensive experience in program administration and delivery of energy-efficiency program services that target single and multi-family dwellings, as well as mobile homes, including those occupied by low-income families.

Services include:

- Program administration and oversight
- Marketing, Outreach, and Enrollment
- Central air conditioner and heat pump, installation, replacement and recycling
- Forced air furnace repair, installation, and replacement
- Duct testing and Sealing
- Appliance installation, replacement and recycling
- Packaged Terminal and Ductless System Installation, replacement and recycling
- Window or wall air conditioner / heat-pump installation, replacement and recycling
- Window or wall evaporative cooler installation,
- Weatherization and insulation services

La Cooperativa is the association of the National Farmworker Jobs Program -- WIA 167 -- grantees in the State of California. La Cooperativa's members provide education, training, placement, and self-sufficiency services to California's migrant and seasonal farmworkers and other rural and semi-rural poor. La Cooperativa's Mission is to enhance the quality of life for California's migrant and seasonal farmworkers and their families. La Cooperativa's members provide services in 82 access points located in all 34 of California's significant agricultural counties. Services for the WIA 167 and network programs are delivered by over 1,100 staff many of whom are bilingual and bicultural.

La Cooperativa has 42 years of with advocacy for farm workers and over 30 years of administration of contracts with the State as a pass through for our members, all designated as Farm Worker Grantees by the Federal Government. Currently we have \$13.2 Million for the Drought Jobs program in drought affected counties and \$7.2 million to do a Jobs Program in Lake County. All participants are farm workers and agricultural working poor. This is a model for reaching our constituents, the farmworker, that has extremely successful over several decades.

Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

CHOC Energy is an Energy Savings Assistance contractor serving 5 counties in Northern California. We have been designated a top low income weatherization contractor over the years. Our success comes from focused community engagement, quality, safety, and customer service. CHOC, the parent organization, is an award winning non-profit affordable community housing developer and manager with over 30 years' experience in bringing quality, energy efficient housing to disadvantaged communities. In 2008, CHOC extended programs to disadvantaged communities by adding weatherization services that save energy and reduce greenhouse gas. We are data driven and have invested heavily in technological tools to better identify and serve disadvantaged communities. In addition, we can demonstrate a strong organizational financial position and have been successful in stabilizing and growing our organization despite the recent downturn in the economy. The leadership team is sophisticated and experienced and poised to expand. We welcome working with likeminded partners.

Regarding the LIWP contract my agency is interested in being a sub to the regional agency. We have been providing Energy services to the Santa Barbara County for over 20 years. We provide utility assistance for about 1300 families and weatherization Services for about 300 families annually. We have established relationships with existing agencies such as Family Service Centers in the DAC, Head Start and local food pantries. We also recently placed an intake staff person in our Satellite office within the DAC to help expedite applications as they come in. We also have a QCI certified inspector and two BPI certified assessor/inspector on staff. We have currently hired a third assessor and will be looking to add a contractor as well to address the increase in jobs.

WHO WE ARE:

President Lydia Flores and Vice President Elise Kleiber have combined over 55 years in the insulation and energy conservation industry. American Insulation, Inc. is certified WMBE and currently has three locations San Diego, Riverside and Turlock. Our branches serve all four Investor Owned Utilities (SDG&E, PG&E, SCG and SCE) for the Energy Saving Assistance Program. Combined our Riverside and Turlock branches have outreached and weatherized more than 25,000 ESA Program customers.

American Insulation, Riverside currently has a team of traditional Program Representatives outreaching, enrolling and assessing homes within Riverside County. Along with creating and implementing a whole neighborhood approach and utilizing outbound calling efforts American Insulation's "One Stop Shop" process supports a customer's enrollment in ESA as well as receiving all feasible measures in one visit. Today, American Insulation has outreached and weatherized over 10,000 homes for SCG & SCE.

American Insulation, San Diego continues to be a leading weatherization contractor for SDG&E's ESA Program and has installed ESA program measures in more the 20,000 homes. Between the years of 2010-2012 American Insulation partnered with RHA, Inc. in rolling out SDG&E's Moderate Income Direct Install program. In preparation for this collaboration American Insulation became BPI certified. Today, American Insulation is SDG&E's Outreach, Marketing and Installation contractor for MIDI, reporting approximately 1200 units treated in 2014-2015.

Build It Green (BIG) is a nonprofit organization comprised of thought leaders and building industry veterans who share a vision for better buildings and a diligence for getting results.

Integrity: We do the right thing for people and the planet. As a trusted partner, we communicate with honesty and transparency.

Collaboration: We bring people and organizations together to build relationships that drive innovation and impact.

Dedication: We readily tackle big challenges, applying technical expertise and pragmatic solutions.

Impact: We make a measurable difference, delivering results for our clients, our professional network—and our environment.

Our staff includes experienced former contractors and technicians, and senior managers who have designed and implemented a range of utility and private-sector energy efficiency and green building programs for the residential sector, both low-income and market rate.

- Leads implementation of the Energy Upgrade California® Home Upgrade program in PG&E territory.
- Implements PG&E's AC Quality Care rebate program
- Trained more than 8,000 building and real estate professionals on green building best practices, building science, and green business fundamentals.
- Certified more than 31,000 homes as GreenPoint Rated.

Rising Sun Energy Center is a local nonprofit that provides green training and employment for youth and low-income adults, as well as residential energy efficiency services for underserved communities. Rising Sun has operated a direct-install residential energy efficiency and water conservation program, California Youth Energy Services (CYES), since 2000. CYES employs local youth to deliver this program in the counties of Alameda, Contra Costa, Marin, San Joaquin, Solano, and Sonoma.

Rising Sun has the capacity to serve as a Regional Administrator in Region 2, and is also interested in working as an implementer of direct-install energy efficiency, outreach, and/or workforce development services in other regions, by running the CYES program within the LIWP model. Current measures installed in CYES include energy efficient lightbulbs, showerheads, faucet aerators, floor lamps, and power strips, as well as a basic solar feasibility assessment and client education. CYES has a track record of successfully implementing and scaling over the past 17 years.

Rising Sun also runs a construction pre-apprenticeship training program (GETS) that serves low-income residents of Alameda and Contra Costa counties. The training focuses on construction, solar, and energy efficiency.

Rising Sun is headquartered in Berkeley with a year-round office in Stockton.

Regardless if you are a business owner, a learning institution or you just want to lower your electric bill at home, Highlands Energy Services has the plan for you that will help you save on your expenses and give you a chance to reinvest funds back into what really matters to you. The whole process begins with the comprehensive efficiency and safety audit where we will help you discover possible inefficiencies in your current infrastructure. We then work with you to find what is the most important to you and find the best solutions.

Some of the services that we provide are efficiency monitoring, safety audits for schools and many others. We also look for possible hazards like gas leaks or asbestos which can be harmful to anyone. Take the first step and contact us today about setting up an efficiency audit and let us help you make our Central Valley cleaner and safer for everyone.

Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

American Electric Supply is an independent electrical distributor that has been in business since 1984. We are a full line electrical wholesaler with a specialized energy efficiency team. With our own fleet of 30' stake bed trucks and a 24/5 warehouse we are capable of meeting customer's unique delivery needs and filling emergency orders quickly. Our knowledgeable team has earned multiple certifications including: LEED Green Associate, Lighting Certification (LC), and NAILD LS-I. We have also worked with all three major utilities in CA and supplied material to contractors for ESAP, direct install, midstream, and other utility contracts.

We are a full services insulation energy efficiency contractor specializing in removing insulation from attics and crawlspaces, air sealing those areas, then reinsulating them in "meets or exceeds" compliance with regulatory requirements. Alcal also installs radiant barriers in attics, and has a full customer service department to schedule and perform work with homeowners, using our crews and branches in San Diego, Riverside, Los Angeles, Fresno, Fremont, Sacramento, Santa Rosa, Stockton and Monterey.

Q5: Description In ~200 Words describe your contracting preferences, skills, capacities and strengths to serve low-income communities in designated Disadvantaged Communities (DACs)

TruTeam of California Inc., formerly Western Insulation L.P., has been a contractor providing energy efficiency services to the low income community since 1984. TruTeam has extensive experience with the Energy Saving Assistance Program as a contractor throughout California for Richard Heath & Associates, Pacific Gas & Electric, and Southern California Gas Company. TruTeam also has experience as a sub-contractor for the LIHEAP, LIWIP, and DOE (WAP) programs working with Fresno Economic Opportunities' Commission, San Joaquin County and Community Action Partnership of Riverside County. All of our trucks are staffed with two certified and trained technicians. TruTeam has the capabilities to perform all energy efficiency measure, repair and replace HVAC systems, water heaters, toilets, as well as most water conserving devices. We also have the ability to install new doors and windows when required.
